

Premium Organic Soils

Nourishing our soils... as Nature intended

ORGANIC POTTING MIX

Salish Soils Organic Fish Compost is the foundation of all blends of Salish Soils and is engineered and formulated to enhance soil fertility, porosity, disease resistance and water retention. Its primary ingredients are composted fish, forest and green waste and coconut coir. Developed by a team of plant scientists, agronomists and growers, Salish Soils are formulated to the highest commercial standards for nutritional characteristics and engineered soil structure. Gardeners can safely seed or transplant seedlings directly into Salish Soils. Salish Soils are produced in a state-of-the-art facility and are **odourless and pathogen and weed-free**.

DIRECTIONS FOR USE

Salish Soils Organic Fish Compost is the foundation of all Salish Soils. Depending on the quality of soils in your **vegetable or flower gardens**, use our Organic Fish Compost as the soil medium or blend it with your existing soils. For **trees, shrubs and perennials** work generous amounts of Organic Fish Compost into the planting hole or into the top 5 to 15 cm (2 to 6 in) of surface soil in existing gardens. Test results demonstrate that our Salish Soils Organic Fish Compost has nutritional characteristics that are all in the optimum range for seeding, transplanting, growing and top dressing your plants as well as for prolonged fruit, flower and turf production:

NUTRITION	VALUE (ppm)	PREFERRED RANGE (most plants)
pH	6.4	5.5 to 7
EC	2.8	1 to 5
Available Nitrogen	170	50 to 200
Available Phosphorous	125	25 to 250
Available Potassium	1600	500 to 2000

Available in Powell River from
4240 Padgett Road • 604.485.2234

Salish Soils Organic Garden Mix is the foundation of all Salish Soils garden soils and is blended to a lighter texture to enhance drainage. Depending on the quality of soil in your vegetable or flower gardens, use Organic Garden Mix as the soil medium or blend it with your existing soils. For trees, shrubs and perennials, work generous amounts of Organic Garden Mix into the planting hole or into the top 5 to 15 cm (2 to 6 in) of surface soil in existing gardens.

Salish Soils Organic Potting Mix is the finest blend of Salish Soils garden mix, fortified with certified organic fertilizers and glacial rock dust to support germination and promote strong root development (for a complete nutritional analysis, visit us at www.salishsoils.ca). Our Organic Potting Mix is engineered and formulated to the most stringent specifications for commercial nurseries and organic growers. Gardeners can safely **seed or transplant seedlings** directly into our Organic Potting Mix or it can be used as a supplementary top dressing around vegetables or potted plants.

REGULATORY COMPLIANCE WITH COMPOSTING STANDARDS

Using the proprietary Gore Cover™ composting technology, Salish Soils Inc.'s composting process meets all of the regulatory requirements of the BC Ministry of Environment's "Organic Materials Recycling Regulations" for the highest quality, odourless and weed-free Class A Compost.

SALISH SOILS TIP

*Always collect the nutrient-rich drainage
from the bottom of plants for re-use.*
